

Dry-Type Transformer

SCBH15 Amorphous Alloy Dry-Type Transformer

10kV-class amorphous-alloy dry-type transformer combining the ultra-low no-load loss of amorphous cores with the fire-safety of cast-resin dry-type construction.

TECHNICAL SPECIFICATIONS

Rated Voltage	6.3 / 10 / 10.5 / 11 kV
Capacity	200 – 2500 kVA
LV Voltage	0.4 kV
Connection	Dyn11
Tap Range	$\pm 2 \times 2.5\%$ / $\pm 5\%$
Impedance	4.0% / 6.0% / 8.0%
Core	Amorphous alloy
Standards	GB/T 10228 / IEC 60076-11

KEY FEATURES

- ▶ Amorphous core — no-load loss dramatically reduced.
- ▶ Maximum energy saving for 24/7 operation.
- ▶ Cast-resin dry construction — fire-safe, indoor.
- ▶ Ideal for green buildings and data centers.
